## Preface

This EFORT textbook was developed by the Executive Committee following the excellent *Surgical Techniques in Orthopaedics and Traumatology* edited by Prof. Jacques Duparc a decade ago.

Following discussions with two major publishers, we were assured that a hard copy textbook/encyclopedia would fill an important niche in the surgical literature.

Our aim was to produce a text which would act as a surgical techniques guide, but also embrace the total management of the patients which, it is now realised, is vital to best surgical practice and maximal patient outcomes.

I was very enthusiastic because, as an Englishman with some exposure to European literature and practice, I realised this book would present an exciting opportunity to bring together and publicise the rich variety and quality of clinical practice, research, and literature available in Europe, which was not fully appreciated by much of the English-speaking world.

The layout of the book is traditional in some ways, but I was anxious that all the authors should present their views in their own personal style. Therefore the book is arranged in 10 sections and the chapters have a common overall format. Each chapter has a contents section for easy checking and keywords, but the “flavour” of the authors’ professional approach to the topic is apparent from reading each individual chapter.

Hence, this book is a unique collection of chapters on all the major conditions we deal with in orthopaedics and traumatology, presented in a lively way and embracing many well-tested techniques and management protocols.

The overall aim was to produce a source (major reference work) which will be equally valuable to trainees, all those involved in education and training, and those whose profession is in a general rather than super-specialised practice. Hence each chapter has sub-sections on, literature, relevant basic sciences, clinical assessment, indications for surgery, pre-operative planning, surgical techniques, post-operative management, rehabilitation, complications and outcomes.

I must pay tribute to the Section Editors who have been excellent and without whom the book would not have been started, let alone written. Here I must mention particularly Franz Langlais, who was tragically taken from us early on. Their expertise and enthusiasm have been invaluable. Nevertheless, because of the requirement to have a common approach and theme, and

conscious that many authors are not primary English speakers, I thought it essential to edit and review the whole text personally. Therefore, any defects are mine.

Throughout I have had unqualified support from all my colleagues on the Executive Committee, in particular the supervising Presidents, Karl-Göran Thorngren, Miklos Szendroi, Pierre Hoffmeyer and Manuel Cassiano Neves, together with an abundance of useful advice. Per Kjaersgaard-Anderson has been a tower of strength as my adviser especially in our final preparation and negotiations.

The actual process of producing such a book is sometimes challenging. It would not have been possible without my secretary/PA, Rosemary Radband. Her rapid and expert way of handling data, and some authors, made it possible. **The Springer team – Gabriele Schroeder, Sylvia Blago and particularly Simone Giesler – has been excellent, expert, completely professional, and a pleasure to work with.** Latterly Susan Davenport of EFORT has given unstinting support.

This task has been a great privilege and pleasure for me. I have come to appreciate and sometimes wonder at the works of my author colleagues. My thanks are not sufficient to express my gratitude to you all.

This book may never be published again in hard copy but the E-copy will be easy to update in future. We now have an authoritative and unique European base for our future educational programmes which will, I hope, enrich all our surgical lives.

George Bentley

London, 2014

# Contents

## Volume 1

<b>Part I General Orthopaedics and Traumatology</b> .....	<b>1</b>
<b>Musculo-Skeletal Imaging</b> .....	<b>3</b>
Philippa Tyler and Asif Saifuddin	
<b>Operating Theatres and Avoidance of Surgical Sepsis</b> .....	<b>63</b>
Paolo Gallinaro, Elena Maria Brach del Prever, Alessandro Bistolfi, Antonio Odasso, Matteo Bo, and Carlo Marco Masoero	
<b>Bone Autografting, Allografting and Banking</b> .....	<b>77</b>
Tom Van Isacker, Olivier Cornu, Olivier Barbier, Denis Dufrane, Antoine de Gheldere, and Christian Delloye	
<b>Bone Substitutes in Clinical Practice</b> .....	<b>91</b>
Jari Salo	
<b>Organisational Aspects of Trauma Care</b> .....	<b>97</b>
Imran Anwar, Dan Butler, and Keith Willett	
<b>Classification of Long Bone Fractures</b> .....	<b>115</b>
Thierry Rod Fleury and Richard Stern	
<b>Non-Operative Treatment of Long Bone Fractures in Adults</b> .....	<b>139</b>
J. Fabry and Pierre-Paul Casteleyn	
<b>External Fixation in Fracture Management</b> .....	<b>159</b>
Peter Calder	
<b>Fractures with Arterial Injury</b> .....	<b>179</b>
Panayotis N. Soucacos and Zinon T. Kokkalis	
<b>Biologics in Open Fractures</b> .....	<b>211</b>
Christian Kleber and Norbert P. Haas	
<b>Compartment Syndromes in the Lower Limb</b> .....	<b>221</b>
Peter V. Giannoudis, Rozalia Dimitriou, and George Kontakis	
<b>Management of Delayed Union, Non-Union and Mal-Union of Long Bone Fractures</b> .....	<b>241</b>
Gershon Volpin and Haim Shtarker	

<b>Necrotising Fasciitis</b> .....	267
Nikolaos K. Kanakaris and Peter V. Giannoudis	
<b>Osteoporosis, Fragility, Falls and Fractures</b> .....	281
Karl-Göran Thorngren	
<b>Management of Synovial Disorders</b> .....	301
Zois P. Stavrou and Petros Z. Stavrou	
<b>Orthopaedic Management of the Haemophilias</b> .....	319
Richard Wallensten	
<b>Infections in Orthopaedics and Fractures</b> .....	331
Eivind Witso	
<b>Thromboprophylaxis</b> .....	365
David Warwick	
<b>Surgical Amputations</b> .....	375
John C. Angel	
 <b>Volume 2</b>	
<b>Part II Spine</b> .....	<b>405</b>
<b>Applications of Protheses and Fusion in the Cervical Spine</b> .....	407
Robert W. Marshall and Neta Raz	
<b>Surgical Treatment of the Cervical Spine in Rheumatoid Arthritis</b> .....	425
Zdenek Klezl and Jan Stulik	
<b>Thoracic Outlet Syndrome</b> .....	449
Henk Giele	
<b>Conservative Management of Spinal Deformity in Childhood</b> .....	463
Federico Canavese, Dimitri Ceroni, and André Kaelin	
<b>New Surgical Techniques in Scoliosis</b> .....	483
Acke Ohlin	
<b>Surgical Management of Neuromuscular Scoliosis</b> .....	499
J. Brad Williamson	
<b>Surgical Management of Adult Scoliosis</b> .....	521
Norbert Passuti, G. A. Odri, and P. M. Longis	
<b>Spondylolysis With or Without Spondylolisthesis</b> .....	533
Philippe Gillet	
<b>Microdiscectomy</b> .....	557
Trichy S. Rajagopal and Robert W. Marshall	

<b>Applications of Lumbar Spinal Fusion and Disc Replacement</b> .....	581
Robert W. Marshall and Neta Raz	
<b>Spinal Osteotomy – Indications and Techniques</b> .....	609
Enric Càceres Palou	
<b>Posterior Decompression for Lumbar Spinal Stenosis</b> .....	625
Franco Postacchini and Roberto Postacchini	
<b>Minimally-Invasive Anterior Lumbar Spinal Fusion</b> .....	643
H. Michael Mayer	
<b>Sub-Total and Total Vertebrectomy for Tumours</b> .....	661
Stefano Boriani, Joseph Schwab, Stefano Bandiera, Simone Colangeli, Riccardo Ghermandi, and Alessandro Gasbarrini	
<b>Computer-Aided Spine Surgery</b> .....	677
Teija Lund, Timo Laine, Heikki Österman, Timo Yrjönen, and Dietrich Schlenzka	
<b>General Management of Spinal Injuries</b> .....	697
César Vincent and Charles Court
